

# Flori vNext Golden Paper

A synthetic document for deterministic offline acceptance.

## 1. Pipeline

A source becomes a Job. Each Task emits only declared Artifacts.

Evidence keeps page coordinates so every note citation is verifiable.

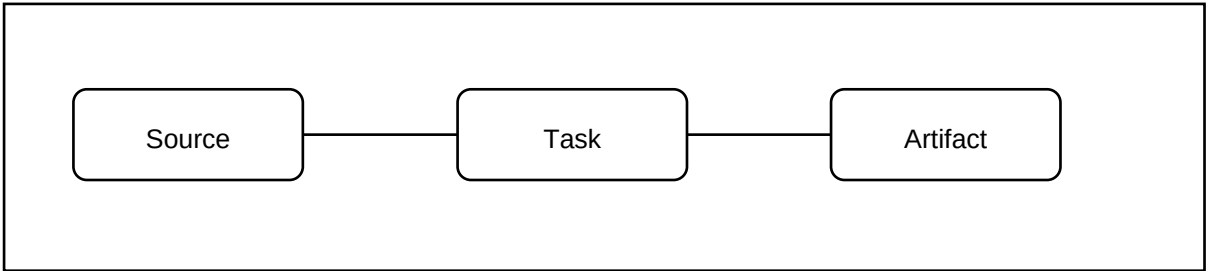

Figure 1: Declared outputs form the only publishable artifact set.

Table 1: Evidence locator examples

| Kind       | Source | Start  | End     |
|------------|--------|--------|---------|
| pdf_page   | page 1 | 72,522 | 522,622 |
| video_time | clip   | 0 ms   | 1000 ms |

## 2. Publication

A successful Job atomically rotates current and previous.

A failed Job never changes the published version.
